CLEAN AIR SOLUTIONS BY PENTAIR GOYEN MECAIR

Pentair is the global leader in reliable components, from pulse jet valves and pulse cleaning controllers through to certified engineered header tank solutions with or without full immersion valves. Since 1935, through our globally recognized brands Goyen and Mecair, we have provided engineering partnerships to some of the world's leading dust collector manufacturers.

Our valves deliver the most powerful air pulse. These diaphragm valves are designed for baghouses in which reverse pulse jet systems clean the filters, including all bag filters, cartridge filters, envelope filters, ceramic filters and sintered metal fiber filters.

Their tough and reliable design has led to their use in high-performance systems around the world to control the dispersion of noxious substances, improve indoor air quality in workplaces, or prevent harmful dust emissions. Advanced technology makes them suitable for demanding industries and processes, including:

- cement production
- mining applications
- silo and conveyor systems, bulk goods handling
- general industrial dust collection
- improving indoor workplace air quality
- preventing harmful emissions
- in the power industry, protecting boilers and gas turbines from dust particles

With quality being one of our core strengths we are accredited with CSA, UL, CE, ATEX and ISO 9001.

We support this process through our specialised software GOCO as part of our consultation and provide additional performance testing and modelling using computational fluid dynamics to ensure we:

- eliminate risk in your systems
- minimise your operating costs
- increase your filter life

Goyen and Mecair's advanced application expertise, along with our wide product range and global reach, has allowed us to maintain our valuable long-term customer partnerships based on innovation, experience and engineering trust.

MECAIR - 6 & 8" TANKS WITH 1½" VALVES

HEADER TANK SOLUTIONS

PRODUCT LEAFLET

The 1.5" port Mecair Full Immersion 512G and 514G Series technologies are high-performance filter cleaning systems delivering high filter cleaning flow rates and precise control of air consumption through the use of a super-responsive diaphragm assembly. These systems are widely implemented throughout industrial air filtration applications as well as for self-cleaning gas turbine intake filter systems. The Full Immersion is available with stainless steel or carbon steel tanks, in a variety of surface treatments, to meet PED or ASME certifications as required.

BENEFITS

- Exceptional service life
- Suitable for bag, cartridge and envelope filters
- Available with remote pilot or integral pilot arrangements
- High-quality precision seal and premium fabric-reinforced Nitrile diaphragm
- Proven longevity under typical operating conditions

TANK CERTIFICATIONS AVAILABLE

- PED 2014/68/EU
- TR CU 032/2013 & TR CU 010/2011
- SELO Certification
- ASME U & UM Stamp + NB
- CRN for all provinces
- AS/NS1200 standard for Design Verification and Registration
- RINA Naval Certification
- DNV Naval Ship Rules Certification
- NR-13
- SI 4295
- SANS 347
- TISI
- MOM

Note: Other tank certifications maybe available upon request

CODES & TECHNICAL CHARACTERISTICS

S6C64G0N04P180M5

Tank size

- S6** 6" tanks
S8 8" tanks

Tank configuration

- C** Full immersion tank

Valve size and tank

- 12** 1.5" single-stage valve, 8" tank
14 1.5" dual-stage valve, 8" tank
62 1.5" single-stage valve, 6" tank
64 1.5" dual-stage valve, 6" tank

Valve type

- G** FIG valve

Diaphragm material

- 0** Nitrile (-40°C; +70°C)
1 Viton(-29°C; +232°C)
4 Low temperature, Nitrile membrane, Polyethylene seat, Low temp: -60°C to +82°C

Voltage options (Only if integrally piloted)

- 3** Dual rating: 110 V DC
 220/240 V 50/60 Hz
4 Dual rating: 48 V DC
 115 V 50/60 Hz
5 Dual rating: 24 V DC
 48 V 50/60 Hz
6 Dual rating: 12 V DC
 24 V 50/60 Hz

Solenoid (Only if integrally piloted)

- M** SB4 Series

Pitch

- 135** Minimum for 6" Carbon Steel Tank
150 Minimum for 6" Stainless Steel Tank
145 Minimum for 8" Carbon Steel Tank
155 Minimum for 8" Stainless Steel Tank

valves

- N01, N02, etc.**

Note: When specifying the system, check temperature and pressure limits for tank, diaphragm and solenoids. Different temperature ranges maybe available, please consult your options with Pentair.

CONSTRUCTION FEATURES - VALVE

TOP COVER	Diecast aluminium (E-coat black)
BODY	Diecast aluminium (E-coat black)
PILOT BASE	Aluminium (anodised)
PILOT	Stainless steel
DIAPHRAGM	Refer to options in part number code
DIAPHRAGM SEAT	Nylon (standard)
BOLTS	Stainless steel
DIAPHRAGM BACKING DISK	Stainless steel
DIAPHRAGM SPRING	Stainless steel

TANK CHARACTERISTICS

CARBON STEEL	-20°C to 110°C
STAINLESS STEEL	-196°C to 93°C
PRESSURE RANGE	1 bar to 8.0 bar
CARBON STEEL - LOW TEMPERATURE	-40°C to 110°C

When specifying the system, check temperature and pressure limits for tank, diaphragm and solenoids.

Different temperature ranges may be available; please consult your options with Mecair.
